DETAILED ACTION

1. This action is responsive to communications: CPA, filed on 11/28/01.
2. Claims 1-16 are pending in the case. Claims 1-3, 5-7, 8-11 and 13-15 are independent claims.

Art Unit: 2672

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

1. Claims 1-3, 5-7, 9-11 and 13-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Schwuttke et al., U.S. Patent 6,222,547, 4/2001.

As per independent claim 1, Schwuttke discloses generating a grid based on a plurality of data values (col. 6-7, ll. 63-5), associating each data value with a geometric shape according to a predetermined set of rules (col. 6, ll. 29-34; col. 7, ll. 10-27), placing the shapes on the grid (col. 7, ll. 20-24) and displaying visual and geometric information placed on the grid in graphical form (FIGS. 4-7).

As per independent claim 2, Schwuttke discloses identifying a plurality of numerical attributes associated with each data value (FIG. 2; col. 6, ll. 8-29; col. 7, ll. 3-5, 11-18) and associating each numerical attribute with a visual attribute (col. 7, ll. 3-5, 11-18). The rejection as applied to claim 1 is included herein.

Art Unit: 2672

As per independent claim 3, Schwuttke discloses extracting a plurality of data values associated with a matrix (FIG. 7; col. 6-7, ll. 63-5) from the geometric representation (FIGS. 4 & 5). The rejection as applied to claim 1 is included herein.

As per independent claims 5 and 9, Schwuttke discloses a computer usable medium having code for implementing the method of claim 1 (col. 5, ll. 37-45). Thus the rejection as applied to claim 1 is included herein.

As per independent claims 6 and 10, Schwuttke discloses a computer usable medium having code for implementing the method of claim 2 (col. 5, ll. 37-45). Thus the rejection as applied to claim 2 is included herein.

As per independent claims 7 and 11, Schwuttke discloses a computer usable medium having code for implementing the method of claim 3 (col. 5, ll. 37-45). Thus the rejection as applied to claim 3 is included herein.

As per independent claim 13, Schwuttke discloses a storage device having instructions for implementing the method of claim 1 (col. 5, ll. 37-45). Thus the rejection as applied to claim 1 is included herein.

Art Unit: 2672

As per independent claims 14, Schwuttke discloses a storage device having instructions for implementing the method of claim 2 (col. 5, ll. 37-45). Thus the rejection as applied to claim 2 is included herein.

As per independent claims 15, Schwuttke discloses a storage device having instructions for implementing the method of claim 3 (col. 5, ll. 37-45). Thus the rejection as applied to claim 3 is included herein.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 4, 8, 12 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schwuttke et al., U.S. Patent 6,222,547, 4/2001, 345/440.

As per dependent claims 4, 8, 12 and 16, Schwuttke fails to disclose a conductance matrix. However it would have been obvious to one skilled in the art to use the teachings of Schwuttke because he graphically displays electrical data in a matrix (col 7, ll. 23 et seq.; FIGS. 2 & 4; col. 6, ll. 8 et seq.).

Response to Arguments

1. Applicant's arguments filed 1/7/02 have been fully considered but they are not persuasive. A grid generated based on data values is inherent based on the Schwuttke disclosure because each block represented in a column of FIG. 5A represents a grid that corresponds to a category of data having a plurality of associated nominal values. Additionally, a grid is only generated in each block where data is represented. Each nominal value is displayed in a grid using representative graphical symbols. Therefore the rejection in view of Schwuttke is maintained.
